Re: Contribution to Research

Dear Adrian,

I would like to express my thanks and appreciation for your work on the DeCQuTest project, including your Internet training material that you have created.

I feel that this material shows a good insight into the subject of electromagnetic compatibility and has a scholarly approach to describing the different categories. I believe that it will prove to be a valuable resource, both within the project and for external readers. My only criticism would be that the pages are rather slow to load.

With Best Regards,

A handwritten signature in black ink, appearing to read 'Robert Ball', written in a cursive style.

Robert
